

## Global Supplier of Custom-Engineered Industrial Tapes & Accessories

Transact International is managed by professionals with extensive expertise, experience, and first-hand knowledge of the tapes industry, wire brushes, heat shrink sleeves, and oilfield services.

We manufacture custom-engineered pressure-sensitive tapes in a wide range of varieties to meet and exceed our clients' expectations. Our wire brushes are designed and produced to meet the specific requirements of our clients.

Transact International is led by experts with in-depth knowledge of the tapes industry, oilfields, anti-corrosive coatings, and long-haul logistics. We operate a well-equipped quality assurance laboratory staffed with trained personnel to conduct all required tests in support of our manufacturing processes.

Over the years, our expertise has enabled us to consistently expand our product range. Our products are known for their zero-defect quality and are widely used by international customers.

## FEATURED PRODUCTS

### MASKING TAPE

Masking tape, also known as sticky tape, is a type of pressure-sensitive tape made of a thin and easy-to-tear paper, and an easily released pressure-sensitive adhesive. This crepe Paper Masking Tape exhibits high adhesion, high cohesion and high holding power. The adhesive is the key element to its usefulness, as it allows the tape to be easily removed without leaving residue or damaging the surface to which it is applied. The tape is available in several strengths, rated on a 1-100 scale based on the strength of the adhesive. Most painting operations will require a tape in the 50 range. Household masking tape is made of an even weaker paper and lower-grade adhesive.

Ready to use masking tapes, come with different size and length, customized size and length also available in various temperatures ranging from 60 Deg C to 180 Deg C.

For high temperature masking tape, the adhesive is a specially formulated rubber based for high temperature application. It also has good resistance to solvents, oil and water.

## ALUMINIUM TAPE

Aluminium Foil Tapes are conformable, conductors and heat reflective. Can be used for high temperature/cold temperature applications, EMI/RFI shielding, ducting and thermal spray masking, anti corrosive coating/painting masking. We can quote emulsion, solvent and silicone adhesive on the foil depending on the customers specification. These tapes have aggressive permanent adhesive coating with siliconized release paper backing.

## FILAMENT TAPE

Our Filament tape has fiberglass reinforced backing, very high tensile strength and not easy to break. It can be used against steel straps for heavy duty packing and mounting of articles in white good industry. The Polypropylene backing provides excellent abrasion, moisture and scuff resistant. The adhesive is specially formulated to provide good adhesion to fibre board surfaces we also have residue free filament tape.

## POLYAMIDE TAPE

Our polyamide tape is a polyimide film tape incorporating a high-performance silicone adhesive. The product is designed for numerous temperature masking application, and is approved for use in electrical insulation applications meeting class H requirements.

Our vast industrial expertise enable us to manufacture and supply impeccable quality of Polyimide Tape and can be made available in various thicknesses and colours. Polyamide tapes are precisely manufactured using quality tested raw materials in adherence with defined industrial standards. Especially designed for applications in high temperature environments. Polyamide tapes are duly examined on varying parameters in order to ensure their flawlessness. It has a wide Operation Temperature Range upto 750°F/400°C.

These tapes are flame retardant and it is used widely in wave soldering, Insulation Circuit Boards, High Temperatures Powder Coating, fiber optic cables, automotive sensor & manifolds. electrical Insulation of various high temperatures coils, motors and transformers.

## FINE LINE GREEN TAPE

Fine Line Green Tape is manufactured using natural rubber latex-coated vinyl film. It's made for consistent stretching, which aids in the creation of better paint lines. The adhesive and backing work together to prevent paint seepage and may be used with almost any solvent or water-based paint masking tape system. Fine Line Masking Tape is a high-end tape used for applications such as automobile paint spraying, band lettering, electroplating.

## RED POLYESTER DOUBLE SIDED TAPE

Red Polyester Double Sided Tape is a polyester sheet coated on both sides with a solvent acrylic adhesive for rapid bonding. The tape contains a flexible carrier substance and a high adhesive strength for use on curves, rough surfaces. It has good heat and moisture resistance, as well as strong adhesive properties, and is suitable for a wide range of applications. It's widely used as a double sided tape for electronics, soundproofing applications, and signage purposes.

High-temperature masking, die-cutting, printing, component calibration, and stiff box joining are all applications for double-sided polyester tape. Labels, LCD panels, and other metal frames and components in electronics are also bonded with it. It may be easily removed without leaving any residue. The tape can be used to laminate wood to fiber doors. It's also easier to secure soundproofing to aluminum sheets with this double-sided tape. The tapes are used to secure banners in the signage and Exhibition sector. The tapes are available in 125 mic, 160 mic, and 205 mic. thick.

## WIRE BRUSHES

All specialty and custom brushes are designed based on the materials, elements, or products you are working with and the corresponding brush characteristics you need to perform the task at hand.

Let us know what your exact application is and what you are hoping to achieve within your design process. We will help you select the most appropriate brush type, filament material and other specifications to meet your needs.

Our Abrasive brushes are precision engineered with the highest quality for those markets with the strictest requirements – for easy integration into automated machinery. Abrasive brushes in power brush or wide face cylinder brush format deliver the flexibility and conformability of a brush, while also imparting the benefits of an abrasive; selection of grit sizes to control finish, functionality for deburring, cleaning, surface finishing, and edge blending.

We offer Power brushes (wheel brushes, cup brushes, and end brushes), Custom designed Cylinder brushes and Strip brushes, and Centerless Grinder brushes in the full range of abrasive grit sizes.

## TARPAULINS

### **Building / Construction Covers.**

Buildings & structures under construction protected from weather and sun rays, very tough and weather resistant material is needed for this purpose. HDPE tarpaulin is excellent; they are weather & water proof. We provide variety of custom sized Tarpaulin in high and super high strength with different GSM(70-450)

Raw material :100% Polyethylene (PE) / LLDPE .

Weight/sqm : 50-100-200-300 micron .

Strength : Super High Strength .

Special treatment : UV stabilized.

Size (in Feet) :2X50, 2X100, 2X200, 4X50, 4X100, 4X200 and other custom sizes.

## TARPAULINS

### HDPE Tarpaulins

We Manufacture high-performance High-Density Polyethylene (HDPE) Tarpaulins Rolls which are light in weight and easy to handle. They provide great flexibility, good tensile strength and resistance to wear and tear. Our HDPE Tarpaulins are made from premium grade polyethylene which provides excellent water and sun resistance with strength.

These high strength Rolls come in Different width Sizes of 6ft, 8ft and 12ft with GSM from 50gsm to 450gsm.

Raw material : High-density polyethylene .

Weight/sqm : Gold (50-90 GSM), Ultra (95-140gsm), Plus (150-170 GSM), Premium (200-350 GSM).

Strength : Medium Strength .

Special treatment : UV stabilized (on request), FR treated (on request).

Roll Width size (in Feet) :6ft, 8ft & 12ft & other custom sizes.

Roll Length size (in Feet) : custom
